i	MEMORANDUM FOR: NSA/TCO	
	ATTENTION :	
	THROUGH : NSA/LO/NPIC	
	SUBJECT : Review of Facilities at Ho-Shih, China	
•	REFERENCE: NSA Requirement (NPIC Project 35010-5)	,
	(NFIC III)ject Syctomy	•
ء.	2. Two high frequency (HF) communications facilities have been noted near Chiu-ho-shih, China, at 42-11N 87-20E, the location of the	- 4
	of the two facilities, situated on the east edge of the Probable Support Base, consists of two large single-story, unidentified buildings; two smaller (75 by 25 feet), single-story, probable control and maintenance buildings; and an antenna field having at least four horizontal dipoles. The smaller second facility is situated to the south of the Probable Support Base and consists of a control building and at least three horizontal dipole antennas. The length, azimuth, and probable orientation of the antennas is as follows:	<u>:</u>
	of the two facilities, situated on the east edge of the Probable Support Base, consists of two large , single-story, unidentified buildings; two smaller (75 by 25 feet), single-story, probable control and maintenance buildings; and an antenna field having at least four horizontal dipoles.
